## **DETAILED ACTION**

### **Continued Examination Under 37 CFR 1.114**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/20/2010 has been entered.

### **Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 10-12, 14-16, 18-20, 22-25, 27-28 and 37-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Li et al (USPAP 20030004850).

Re claims 1-3, 10-12, 14-16, 18-20, 22-25, 27-28 and 37-40: Li teaches a method (and corresponding system and readable medium) comprising: determining, prior to conducting an auction, a maximum and minimum volume to be awarded from a total volume, to a leading successful bidder in the auction; conducting the auction using a processor; and after the auction has been conducted, awarding to the highest ranked bidder in the auction an amount equal to the

minimum and an additional volume, up to the maximum volume, based on a factor that is related to a difference between a first ranked bid and a second ranked bid; and awarding to a second ranked bidder a portion of the total volume ( see at least the figures, ¶¶ 0173-0174, 0179, 109, 112, claim 1).

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 17, 21, 26 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al.

Re claims 17, 21, 26 and 29: Li does not explicitly teach wherein the market feedback includes a rank of the at least one bidder; wherein the auction is a forward auction; wherein the minimum

volume is expressed as a percentage of the total volume; wherein the quantity is a monetary value.

Official notice is hereby taken that these concepts are are old and well known. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Konia's concept to include these feature for the obvious reason of enhancing the flexibility of the system.

.

### **Response to Arguments**

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

### **Conclusion**
